GABLE ROOF VERANDAHS

Designs in the Gable range will not only give your home an elegant outdoor area but with the extra height of a pitched design you'll have a sense of a roomy spacious feel.

WHY CHOOSE A CREATIVE OUTDOORS VERANDAH?

- › Uniquely 100% Australian Bluescope Steel
- › Designed & engineered to suit all wind categories
- › Fully tested & certified to Australian building standards
- › Australia's first all COLORBOND® system
- › Colorbond beams & posts are made in a high gloss, low maintenance finish
- › Installers have been with the company since its inception

GABLE ROOF VERANDAHS

The Pitched Roof, commonly known as Gable is by far the popular choice for flexibility in design options and visual appeal. Our expertise in this field means we can produce and build stand out designs, such as L-shaped Gable or Split-Ridge Gable. Together with your ideas and our knowledge you will be surprised what can be created at your home.

GABLE END STRUCTURE

All structural beams and posts are engineered for strength, the choice of 108mm, 158mm and now the 233mm beam means we can create spans in excess of 10 metres without the need for support posts. The unique fluted columns are two-piece double thickness box beam which provides superior strength in comparison to inferior brands in the industry today.

Roof pitches are available in 17.5, 22.5 or 27.5 degrees so we'll be sure to determine the optimum roofing pitch that best suits your home.

COMPONENTS

Our gable system is complete including all components such as gutter, fascias and fasteners – that are practical, durable and attractive in a variety of COLORBOND® colours and can be combined to suit individual requirements. Gutters are available in various profiles so we can match your existing structure. We recommend installation of box gutters for improved water disposal.

• Box Gutter – optional

• Post shoes

• Downpipes flush mounted and coloured to suit verandahs

• Improved fixing method using painted stainless steel bolts

DESIGNS ARE LIMITLESS

Building and designing verandahs is our passion. If you think you have a difficult area to cover, rest assured because expert designs is what we do best.

GUARANTEE

You will be registered with a Double Warranty, offering a 20 Year Structural Warranty as well as a 20 Year Corrosion Warranty on all Bluescope Steel. All our building materials are backed by manufacturers' warranties. Polycarbonate has a lifetime warranty. Bluescope Roofing has warranty for 20 years for paint flake and peel (delamination) and 30 years for corrosion to perforation. In the unlikely event that you have a claim, we will liaise with authorities on your behalf. We issue each finished structure a unique stainless steel plaque with an individual warranty number. We also have a unique tracking system in place so that we can track your job throughout the entire lifetime of the product.
